

## FORUM POSTS FOR APRIL 2023

Post April 10th

Hi everyone, before we open our first discussion, we want to address the basis of the *Know Thyself Initiative*. Since the first Stage Reason comprises of a detailed examination of the Gnostics role in early Christianity, obviously KTI incorporates Gnosticism, together with esotericism. However, the Initiative also investigates Creation and Evolution from the energetic, consciousness, and archetypal perspective from the Major and Minor *Mysteries* of the Tarot, as well as utilizing a revised doctrine of multiple *Globes, Rounds* and *Root-races*.

Apart from the aforementioned, we include the mystical side of multiple religions, as well as the scientific perspective. In short, we consider Creation, Evolution, Life's purpose, and our role in it, from multiple viewpoints in our open, honest, and hopefully inspired discussions.

In this Forum, we will take key excerpts from the Initiative that contains the accumulated Knowledge of thousands of years that we gathered from multiple sources over 29 years. We start with excerpts from Stage 1 – Reason, because as we wrote:

Everything starts with Reason. Animals possess Attention and Memory, otherwise they would not survive. When they begin to Reason out problems, such as chimpanzees using a stick to get to ants, they are ready to evolve into human beings. As humans, we cannot develop our Creative Imagination without Reason, which is why these two faculties are represented by cards 3 and 4 The Empress and Emperor... Interestingly, as The Empress precedes her consort The Emperor, it suggests that the higher mammals may develop imagination at the same time as they acquire Reason. Regardless, Reason is our gateway to all levels of higher consciousness, because without it we cannot develop Intuition, Wisdom, or Understanding, let alone hope to Transform. Reason underpins everything, which is why we saw such chaos in the world in 2020 and 2021. Due to certain energies, which will be discussed later, a substantial number of people lost the ability to use either Inductive or Deductive reason. (There is no judgment here, just observation.) However, the tide is turning, and more and more are reviewing Humanity's responsibility to redress the ills of racism, bigotry, and injustice. In this way, the Sacred Flame Alphabet, created thousands of years ago can point the way...

Post April 12th

Yesterday I mentioned the ancient belief that the Earth was the center of the universe. Initially, we dismissed this as the limited observation from uneducated people, as with modern telescopes astronomers have located the exact placement of our Solar System. Even so, we were led to see that from a spiritual perspective our home is in fact at the center of the universe because of Life on Earth's role in Creation. This revelation changed our perspective on everything.

In recognizing that we have been evolving inwards we were required to revise H.P. Blavatsky's *Secret Doctrine*, because it meant that only the Earth is involved. Moreover, we learned that there were other universal forces implicated, as there is an "engine" of sorts at the center of the universe driving evolution in Waves. This discovery was made by our friend and I.D.E.A. director Dr. Carl Johan Calleman. Upon first meeting with him in 2011, we thought our theories were incompatible, as Carl had ascertained that the Mayan Calendar revealed over the life of the universe (16 billion years) Nine Waves had driven the evolution of Life, from the most primitive one-celled organism to human beings. However, in his research he discovered the supreme archetype, the Tree of Life was situated at the center as a kind-of axis, which was mirrored by an energy signature surrounding each cell. This brought in the spiritual aspect and allowed us to connect our theories. Then last year he released a new book entitled *Living Universe*: that supported earth centrism. His book was so inspiring that we created our new website 2020 Revision Movement, with the headline, **EARTH REINSTATED AS CENTER OF LIVING UNIVERSE - <https://2020revisionmovement.com/>**

Hi everyone, having emphasized the importance of Reason, I wanted to share how this faculty helped in our 29-year investigation of the nature of reality. Very early on we were guided to *The Secret Doctrine* by Helena Petrova Blavatsky, but since we were traditionalists at the time, its contents seemed a little too out there. Yet something about the doctrine of multiples of seven "globes" and "rounds" in spiritual evolution struck a chord with us, so after meditating and praying about it we heard, "Store the information and think of me as antimatter", which at the time did not help. However, over the years as we amassed and incorporated more information, we began to understand that looking outside was the problem.

Our breakthrough came when Arthur C Clarke produced *The Colors of Infinity* about the discovery of the Mandelbrot Set and Fractal Geometry. Watching this extraordinary inspiring video, which we cannot recommend too highly, we realized

that where Madame Blavatsky went wrong in her hypothesis was depicting the seven globes in a ring, instead, it would be more accurate to show them as concentric circles within each other. Now our only problem with the hypothesis was her belief that before moving through our seven earths, we have moved through seven of the planets Saturn, Jupiter, and Mars, as well as seven versions of our moon. This is where Reason became our ally, as although the ancients only knew the Seven Sacred Planets that started with Saturn, because astronomers have since discovered that the planets Uranus and Neptune, plus the planetoid or dwarf planet Pluto are all outside of Saturn, there had to be more to this belief than meets the eye. Meditating on the problem again I was reminded of the ancient belief that placed the Earth at the center of the universe. Obviously, this could not be referring to our planet's physical placement, as astronomers had determined we are on the outer arm of the Milky Way galaxy, so why was I being reminded of this erroneous belief. Then I remembered that quantum physics has proven that our universe is predominantly empty space.

However, as this is a very complex issue, I will leave that discussion for another time. For anyone who hasn't seen the video, below is the link to Arthur C Clarke's video on YouTube off of our site. Would love to hear your thoughts on it, as well as the Secret Doctrine.

Post April 15th

While investigating our spiritual evolution, we wondered about the so-called Fall of Humanity, especially the account of the Garden of Eden. This question led us to the "*Watcher's mistake*." Interestingly, this "mistake" involved psychedelics mentioned by our member Bles Shamanic Nicoline. Consequently, we would like to address this subject before we get back to the Gnostic version of Creation. Like many people we initially thought the "*Watcher's mistake*" was caused by extraterrestrials, however, as we wrote in section 5a of Stage Reason:

As the date 40,000 B.C.E. for the Fall seemed likely, we felt it was time to rethink our previous conclusions on its cause. So if possible interference of our ancestors, in whatever form was not the cause of the Fall, what could it be? A crucial point was that those responsible for the Fall were the so-called Watchers. We knew the cosmic cultures were Watchers, but so were the angelic realms of spiritual beings. If we removed the former from the equation, this only left the spiritual beings.

The Bible is not the only ancient writing that speaks of huge life spans. The chapter, *Rumors of gods in LOVE The Common Denominator* (LCD) reported how the historian Herodotus recorded such life spans:

*Herodotus, 484 to 425 B.C.E., related that Egyptian priests at Thebes told him of the history of Egypt. Showing him 341 statues, they informed him each statue represented a generation covering, 11,340 years. "They (the priests of Zeus) brought me into a great hall and showed me the huge wooden figures—they say, before these men there were gods who were rulers of Egypt, who lived not at the same time as these men; and, of these gods, one was always supreme ruler. The last of these divine beings to rule Egypt was Horus, the son of Osiris, whom the Greeks call Apollo. They say, Apollo/Horus deposed Typhon and became the last god to rule Egypt. Osiris, in the Greek language, is Dionysus."*

Even so, it was moving to the Bible's greatest patriarch that provided the real breakthrough, because it led us to the greatest source we have for the mysterious Watcher's Mistake, The Book of Enoch. Initially, this is addressed in the same chapter as above in LCD:

*The Book of Enoch relates that angels taught the women sorcery and incantations, and that the results of the angels' unions with the women were giants. Apparently, the angels taught many things, including: "astrology," "astronomy," and "dividing of roots and trees..." The giants become the evil spirits because of the union of spiritual beings (angels) and earthly beings (women). Enoch then brings in a different term, Watchers. These "Watchers" reveal the mysteries to mankind, which results in the multiplying of evil. Amazingly, he says that the "Tree of knowledge", contrary to the Bible, does not bestow death. Instead, it bestows "great wisdom," to anyone who eats of it.*

*...According to Enoch, humankind was destroyed because they knew every secret of the angels. He tells of prophecies that include the information that the righteous in the seventh week will be given the sevenfold doctrine... An interesting fact is that many scholars believe Enoch could be Hermes, because the name Enoch is generic and means initiator, or teacher. Esoterically, Enochian means, "The seer of the open eye..."*

There are four very important points that jumped out from the above extract that were not so obvious when I originally wrote it:

- There seems to be more than one type of being interacting with the humans: angels and watchers.
- It is the angels that "taught...dividing of roots and trees..."
- These "watchers" reveal the mysteries to mankind, which results in the multiplying of evil
- The "Tree of knowledge bestows "great wisdom" to anyone who eats of it"

Through our investigations, we determined the Watchers tasked with observing the development of Life on this planet were both spiritual and cosmic beings. Consequently, if the Watchers who “reveal the mysteries” to humanity are not the cosmic beings, it has to be the spiritual beings, or angels who are responsible for the Fall. This would appear to be a correct assumption as Enoch equates the reason for the destruction to humanity, to knowing “every secret of the angels.”

We kept coming back to the teaching of “dividing of roots and trees” as being a problem. Obviously, we needed to return to the relevant passage in the Book of Enoch. Looking it up on the web and finding a site that published the entire book, we found the passage below:

And all the others together with them took unto themselves wives, and each chose for himself one, and they began to go in unto them and to defile themselves with them, and they taught them charms and enchantments, and the cutting of roots, and made them acquainted with plants.

Moved to dig deeper, we searched the Book of Enoch to see if it could shed more light on the matter. It did as it recorded which angel taught what:

*Semjâzâ taught enchantments, and root-cuttings, Armârôs the resolving of enchantments, Barâqîjâl, taught astrology, Kôkabêl the constellations, Ezêqêêl the knowledge of the clouds, Araqiêl the signs of the earth, Shamsiêl the signs of the sun, and Sariêl the course of the moon."*

What we found most interesting was that “enchantments” connects to “root-cuttings,” because it brings in the emergence of magic. As we wrote:

*...Frances A Yates in her THE ROSICRUCIAN ENLIGHTENMENT relates that there are four kinds of magic. Quoting from Gabriel Naudé's work "Apology for Great Men Suspected of Magic", she explains, "...there are four kinds of magic... divine magic, theurgy or religious magic, goetia, and natural magic." Divine Magic is self-explanatory but I wasn't sure about the rest. Evidently, theurgy or religious magic, is "freeing the soul from the contamination of the body", Goetia magic is another name for "witchcraft." The final kind Natural magic, according to Naudé "...is natural science."*

What our ancestors didn't realize is that the only form that was completely safe is divine magic. Two of the three other kinds “theurgy or religious” and “natural magic” are neutral, wholly dependent on the intent of the practitioner, i.e., when it is used for selfish motives, it is black magic and when it is selfless, it is white

magic. Goetic magic is the most dangerous as Ms. Yates recounts Naudé's warning, "Goetic magic is witchcraft." In other words, this kind of magic is only used for nefarious means...

By the time of the Roman Empire, magical practices were common among the general population. Consequently, it required drastic measures to protect humanity from itself. We know that the leader of the angel or Watchers was responsible for the corruption or Fall of Humanity, by the Book of Enoch reporting of the angel's punishment. Curiously, the leader Azâzêl did not appear associated to any specific teaching:

*"The Lord said to Raphael: 'Bind Azâzêl hand and foot, and cast him into the darkness: and make an opening in the desert, which is in Dûdâêl (God's Kettle/Crucible/Cauldron), and cast him therein. And place upon him rough and jagged rocks, and cover him with darkness, and let him abide there forever, and cover his face that he may not see light. And on the day of the great judgement he shall be cast into the fire. And heal the earth which the angels have corrupted, and proclaim the healing of the earth, that they may heal the plague, and that all the children of men may not perish through all the secret things that the Watchers have disclosed and have taught their sons. And the whole earth has been corrupted through the works that were taught by Azâzêl: to him ascribe all sin."*

Genesis appears to ascribe the Fall to Adam and Eve imbibing of the fruit of the Tree of Knowledge of Good and Evil, however, the Book of Enoch mentions nothing about the "tree," so what was the "forbidden fruit" that so corrupted the human race? Our answer came from our good friend Leyland sending us the latest presentation by Graham Hancock. As the author is famous for his interpretation of ancient buildings, we were intrigued to find this presentation concerned his discovery that the ancient Egyptians used psychotropic plants in sacred ceremonies.

Citing the evidence of certain mushrooms appearing within the hieroglyphs and ancient paintings, Graham Hancock wondered why the Egyptians used them. As there are legends that the sarcophagus in the Great Pyramid was for initiations, he developed his theory. Namely that an initiate would take a hallucinogenic concoction before spending time (probably 3 days) lying in the empty king's chamber in an altered mind state. However, it was Mr. Hancock's connecting cave painting and the use of psychotropic mushrooms that we found most interesting. It captured our attention because in his new book, *THE GLOBAL MIND AND THE RISE OF CIVILIZATION...* Dr. Calleman observes the relevance of cave art in the development of human consciousness. The latter, also

points out that the Mayan Calendar records this development in evolution with Day 5 coinciding with 40,000 B.C.E., and the first appearance of cave art.

For Graham Hancock, the presence not only of therianthropes (a combination of animals and humans), as well as mushrooms on cave walls indicates the “cave artists” were using psychotropic mushrooms to alter their consciousness. This statement caused us to remember that the Fifth Wave, which Dr. Calleman equates with the development of consciousness, started during Day 4 of the Fourth Wave with the increased size of the brain. To us this implies that the development of consciousness and the physical development of the brain occurred simultaneously. If so then this could be a clue to the cause of the Fall.

Removing ancient astronauts visiting our ancestors from the equation of causing the Fall, we have only beings from the spiritual realm as possible candidates. From the above sections of the Book of Enoch, this would appear to be a fair assumption. As such then, we can deduce that something they did triggered the Fall. Still, the Fall although referred to as the “*Watcher’s mistake*” was no small thing, because it resulted in the creation of the false self, not to mention expulsion from the Garden of Eden. As Genesis records, after Adam and Eve imbibe from the Tree of Knowledge of Good and Evil, “...the eyes of them both were opened, and they knew that they were naked...”

[https://bridgetopeaceproject.com/777\\_KTI5-1a3Reason.html#Reason2c](https://bridgetopeaceproject.com/777_KTI5-1a3Reason.html#Reason2c)

For us the fact that plants that have psychedelic properties even exist is proof that we were always meant to discover this at some time. Interestingly, Dr. Carl Calleman appears to agree as we see in his inspired book to investigate the role psychedelics played/play in our evolution: ***QUANTUM SCIENCE of PSYCHEDELICS: The Pineal Gland, Multidimensional Reality, and Mayan Cosmology***. As we wrote on his page TRANSFORMATION on our website:

Carl Calleman's new Book is a groundbreaking exploration of how psychedelics and quantum science are vital to understanding the evolution of consciousness and reality

- Explains why altered states of consciousness exist, how they work, and why psychedelics have the effects that they do
- Describes how quantum waves, rather than the DNA molecule, have been the driving force behind biological and historical evolution

- Explains how psychedelics interact with the human mind to create altered states that may further the continued evolution of consciousness...

Now with Nicoline introducing us to the psychedelic plant *Iboga* that heals, among other things, addiction it seems as though society maybe needs to reevaluate our opinion on these natural plants.

Post April 17th

Last week we posted about the role of psychedelics in our evolution. For our part as we showed in the extended excerpt from Stage 5 Reason, we were able to determine that the “*Watcher’s mistake*” concerned divine messengers revealing knowledge of mind-altering plants long before human-kind was ready. We say ready, because as Carl’s book *QUANTUM SCIENCE of PSYCHEDELICS: The Pineal Gland, Multidimensional Reality, and Mayan Cosmology* alludes, we were always intended to use these plants in our consciousness development.

Whenever the subject of psychedelics came up my mind immediately went to LSD and its famous proponent of the 1960s Dr. Timothy Leary. However, in writing *FOR THE CHILDREN* about the role the ego played in three lives, we learned a lot more about the good doctor because one of those lives was Dr. Carol Sue Rosin, who was a very good friend of his. Obviously, society was not ready for psychedelics in the middle of the last century, but about now. As our member Nicoline pointed out, there are psychedelic plants that can help with the bane of this time, drug addiction, as well as a multitude of mental conditions. Could this be what Carl was alluding to in his book.

Hi everyone, we need to reiterate that this Forum was created to discuss the information on the *Know Thyself Initiative* and to help locate the 777,000 teachers who were born to use it. Although we welcome alternative information because we never stop learning, this is not a platform to vent about non spiritual subjects, such as politics. In this Forum, we examine our spiritual evolution from an energetic and consciousness perspective, which covers multiple topics. We want everyone to engage in open, honest, and respectful discussion as our goal is to use the information to find real solutions and end suffering. Also, we realize that many may wonder where KTI’s information originated, to this end we provided a visual expression of our mission on our website in Stage 4 Knowledge of KTI.

Post April 18th

In light of our recent discussion on what went wrong with our Spiritual Evolution, I feel we maybe should examine how it should have been, which brings us back to the Gnostic teachings of Valentinus, as well as the Kabbalists and Mayan calendar's Tree of Life. However, before discussing Creation from the Gnostic perspective, I want to share a message I received that helped me immensely. "It is impossible for the human brain to comprehend how spiritual forces operate. We can only identify with spiritual operation by relating to concepts we do comprehend." This is why Jesus and ancient teachers used parables to get their point across. The problem with this is that we have tended to anthropomorphize deity when we should see them as energy and consciousness. Yet we were told that "A myth is a way to describe an absolute truth in an abstract way." So, with this caveat let's examine the first phase in the Gnostic myth of Creation.

Putting the "myth" into modern vernacular, essentially the Supreme Being, who the Gnostics called First Father projected Himself into His consort Silence. This would be another expression of Genesis 1:2 "...and darkness *was* upon the face of the deep. And the Spirit of God moved upon the face of the waters..." This projection resulted in a kind-of chain reaction with Silence emanating a divine pair that the Gnostics called Mind and Truth, who in turn emanated another pair Logos and Life, who brought forth the pair Humanity and Church. (It is important to keep in mind these are ancient terms translated into English and we should not confuse them with the definitions of the words church and humanity used today.) Also each pair consisted of masculine or active and feminine or passive energy. These six emanations, together with Silence and the Supreme Being, made up what the Valentinians referred to as the Ogdoad (8). Eventually the Divine Realm, or Pleroma consisted of 30 members. Tomorrow, we examine the development of the Pleroma and consider what was the difference between the Ogdoad and the other 22 members.

Last week we posted about the role of psychedelics in our evolution. For our part as we showed in the extended excerpt from Stage 5 Reason, we were able to determine that the "*Watcher's mistake*" concerned divine messengers revealing knowledge of mind-altering plants long before human-kind was ready. We say ready, because as Carl's book *QUANTUM SCIENCE of PSYCHEDELICS: The Pineal Gland, Multidimensional Reality, and Mayan Cosmology* alludes, we were always intended to use these plants in our consciousness development.

Whenever the subject of psychedelics came up my mind immediately went to LSD and its famous proponent of the 1960s Dr. Timothy Leary. However, in writing *FOR*

*THE CHILDREN* about the role the ego played in three lives, we learned a lot more about the good doctor because one of those lives was Dr. Carol Sue Rosin, who was a very good friend of his. Obviously, society was not ready for psychedelics in the middle of the last century, but about now. As our member Nicoline pointed out, there are psychedelic plants that can help with the bane of this time, drug addiction, as well as a multitude of mental conditions. Could this be what Carl was alluding to in his book.

Carl's reply April 18th

What is the role of psychedelics (with the less provocative name of plant medicines) in the cosmic plan? That is an important question to ask and it by necessity implies the use of the Mayan calendar since that is the only calendar system that is quantized and outlines such a plan based on a sequence of states of consciousness that humanity needs to go through. But after all, a substance does not have to come from a plant in order to have healing effects. Moreover, unless there is a competent therapist present the use of a psychedelic may not be healing and not everyone using such substances will see a decrease in the role of his or her ego. But a potential for this is there for an individual to at least temporarily experience unity consciousness and an unfiltered channel to the diludedvine in the state of consciousness of the 9th Wave.

In the time of Timothy Leary not even the 8th Wave had been activated that precluded any climb to the 9th Wave with the result that even if he people had fascinating experiences and even cosmic and divine such no real transcendence of the ego could take place, in fact because of the dualist nature of the 8th Wave the ego functions of people may have been reinforced by this rather than weakened. What is different after 2011 is that the 9th Wave is in principle accessible and thus also at least also to have temporary experiences of unity consciousness. For this reason everything points to an increased use of psychedelics in the time to come from an evolutionary perspective, but it is not "the only road" and most likely there will be a generation born after 2011 who will fully be able to go to unity consciousness without such substances. It will be like the cave painters (who did not use any psychedelics) that were just born into 5th Wave and unity consciousness until the Fall came with the 6th Wave in 3115 BCE when the first civilizations rose based on the duality of the mind.

Answer to Carl's comment April 18th

Thank you so much Carl for this perspective, it makes me want to take the time to read your book on the subject, waiting in my Kindle list. Your insight provides two important pieces to the puzzle I've been constructing for nearly 3 decades. First it confirms what we have talked and written about, this information is within the Universal subconscious and is accessible to all seekers. I know this because of the fact we investigated the subject from different perspectives, mine was driven to understand the so-called "Fall" of Humanity and its connection to the "*Watcher's mistake*", which I uncovered through esoteric writings. Whereas your approach was from your expertise on the Mayan Calendar and its connection to consciousness evolution.

The second, and most important piece for me was your explanation of the effect of psychedelics, prior to what you refer to the compartmentalization of the human mind, and what I describe as the complete individualization of the Life-principle, but more especially the development of the ego. It explains so much, in particular the development of magic, which I understand led to the isolation of our Earth (Globe D) from the natural cycle of evolution.

Post April 19th

Regarding the Gnostic myth, the First Father and his consort Silence were the epitome of active and passive, as well as masculine and feminine. His projection into Her was in fact the first act of Creation because each pair subsequently emanated another pair, this process continued until as stated there were 14 additional pairs forming the Pleroma. After being told that rather than seeing these pairs in terms of couples we needed to we should regard them as pairs of opposites, such as active and passive or positive and negative.

In *THE GOOD NEWS REVERBERATION*, we associated the pairs as the negative and positive parts of an electrical plug. However, in hindsight as I write about each pair emanating another pair, the division of a cell came to mind. Also there is the fact that Valentinus, who almost became pope, and was a student of Theudas, an acolyte of the Apostle Paul, clearly separated the First Father and Silence together with next 3 pairs of emanations into the ogdoad, and the remaining 11 pairs. I'm sure it hasn't escaped anyone's attention that 11 pairs is 22 members.

Interestingly, it is the last or 22nd feminine and passive member of the Pleroma outside of the Ogdoad that is the direct result of Creation. Shortly after their appearance, Wisdom or Sophia abandoned her active partner What-has-been-Willed

by turning back in search of her origin and in the words of Valentinus, “Was in danger of being absorbed into the Father’s sweetness.” Clearly, this is an analogy of something else. Initially, we interpreted it as when Sophia beheld the magnificence of the Supreme Being, she became mesmerized and like moth flying too close to a flame moved to rejoin Him. So, let’s consider what the Gnostic teacher was trying to tell us. First, we need to remember that the Human Race of the second century had no concept or understanding of electricity, let alone atomic and sub-atomic particles.

I believe if we view the Pleroma as a process akin to cell division, then obviously the original cell First Father contained every member of the Pleroma. To reiterate, “it is impossible for the human brain to comprehend how spiritual forces operate. We can only identify with spiritual operation by relating to concepts we do comprehend.” As Sophia’s action generated the emotions of Fear, Grief, and Confusion within the Pleroma, which required a member known as the Limit creating a barrier between the Pleroma and the emotions. According to Valentinus, it is this action that set the creation of the Universe. Tomorrow, we will look at how the Gnostic Creation came about.

Post April 20th

Hi dear friends, as you know we opened the Forum to discuss the content of the *Know Thyself Initiative* on April 4th and locate the 777,000 teachers born to use this knowledge to help transform the world. As we believe since everyone following this page seeks a more peaceful world, we feel there is a good chance that most if not all of you are potential teachers. To reiterate, we believe transformation requires us to change the way we think. Consequently, we wanted our friends who follow our pages to know that we have started that very process, with an in-depth investigation of Creation from multiple perspectives, including Gnosticism, Kabbalism, the Mayan calendar, and scientific discoveries. In the Forum we encourage our members to share their insights and thoughts, so as to spark inspiration. As Facebook rules and restrictions means I might not have sent each of you a personal invitation, may I take this opportunity in asking each of you to consider that you may be who we are looking for, and add your energy to the Forum on the link below. Have a great day, Namaste, Peace, Love, Joy and Compassion Always, Suzzan

<https://www.facebook.com/groups/622492586559220/>

Post April 20<sup>th</sup>

Despite stating that I would address the Gnostic process of Creation today, I need to share an important insight concerning yesterday's post I received early this morning. When writing *The Good News* between 2004 and 2005, we used the brilliant work of Professor Elaine Pagels in interpreting the Gnostic writings in the *Nag Hammadi Library*, discovered in 1945. Even so, I never dreamt that we could connect the Mayan Calendar to the Gnostic myth. After meeting Carl in 2011 we knew we needed to incorporate his insights on the Calendar into our work, especially after seeing a connection to our discoveries while working with him on his book, *The Global Mind and the Rise of Civilization*. But that's for another time.

Anyway, the insight I received this morning concerned Carl's assertion in his *Purposeful Universe* that not only is there a Tree of Life at the center of the universe driving evolution in Nine consecutive Waves, its signature surrounds every living cell of our bodies. Yesterday, I mentioned that the emanations of the Pleroma reminded me of cell division. This morning I realized if we were to draw the process it could also resemble a family tree, which of course would support Carl's conclusions. Recalling the number of trees associated with creation stories throughout the world, not to mention the famous Kabbalistic Tree of Life, I find that remarkable, don't you. Would love your thoughts and insights on this.

Tomorrow I will post the other insight I received concerning the titles of the six emanations making up the Ogdoad. This time, I used a pillar we were given that said, "The Key to *The Mysteries* is hidden in the English Language."

Post April 21st

Accepting that while in our physical vehicles we may never fully comprehend the Gnostic myth of Creation, I believe that Valentinus provided us with clues within the titles for the members of the Ogdoad. As stated, one of the most important pillars we were given was that "The Key to *The Mysteries* is hidden in the English Language." Over the 29-years this pillar has proven invaluable, none more than finding the hidden messages within Scripture.

In the myth, the names of the first and second pair emanated from the Supreme Being projecting Himself into Silence is translated as Mind and Truth, and Life and Logos respectively, who in turn bring forth "Man" or Humanity, and Church. Meditating on these names, I realized that the titles of the Ogdoad appeared to be predicting the

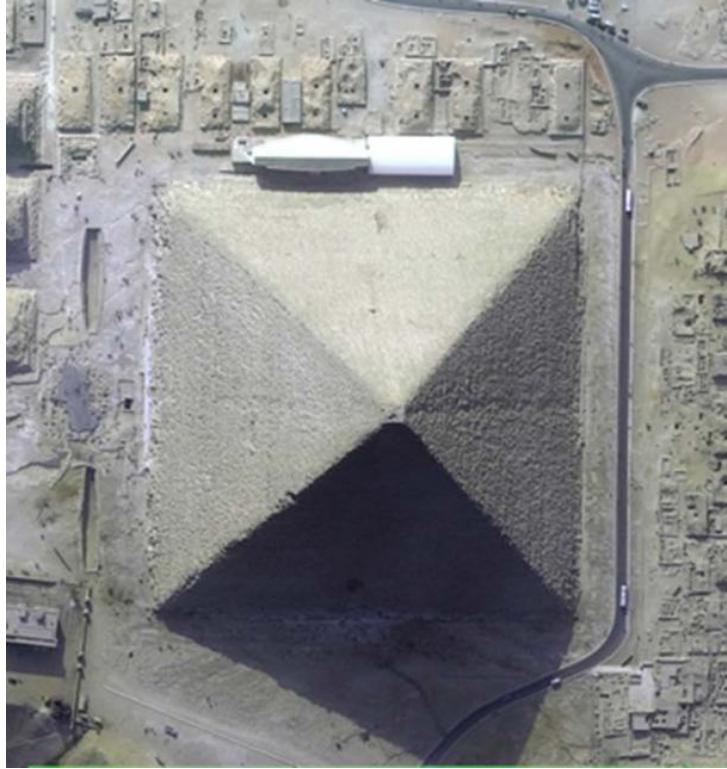

development of Creation. Starting with Mind or as the ancients called it Nous, this is the birth of consciousness, which is revealed in “His” feminine and passive partner’s being designated Truth. However, we should not view Truth here as the opposite to a Lie, rather we need to look at the origin of the word in Greek, which is *Aletheia*. According to Wikipedia it has many meanings in English, including “disclosure”, and “revealing” but the most relevant is the literal meaning “the state of not being hidden; the state of being evident... factuality or reality.” In other words, coming forward, or appearing.

Interestingly, the opposite to *Aletheia* or Truth isn’t associated to lying, rather it is “oblivion, forgetfulness, or concealment.” Since Life comes from Mind and Truth, the message is that every living cell is fully conscious, which reminded me of the *RT group* designating all matter “Cosmic Mind-stuff.” Moreover, this “Mind-stuff” carries the purest untainted energy as it is pure consciousness that emanates Life.

As for Logos, again we need to revert back to the ancient Greek meaning in English, which was literally translated as “word, discourse, or reason.” The author of the article in Wikipedia relates that Logos also means “I put in order, arrange, gather, choose, count, reckon, discern, say, speak.” So here we have Life associated with communication and the ability to reason, which takes on even more importance when we remember that another term for Logos is Word, and Creation was spoken into existence, as Genesis reports “Let there be Light, and there was Light.”

Since the Logos and Life bring forth Humanity and the Church, I think that the deeper message here, is that when Life developed fully articulate speech, and the ability to reason, it was then that we could begin to know our origins by seeking the Divine through religion.

With the completion of the Ogdoad (8), it seemed to say that future Creation was set to fulfill its destiny. As I said, we saw a connection with our discoveries and Carl’s book, *The Global Mind and the Rise of Civilization*. This is because he writes that in 3115 BCE, humankind “downloaded” a new consciousness that partitioned our brains into 8 segments. Amazingly, Carl was able to show us that this event was represented in the Great Pyramid on the Giza Plateau. I for one, always thought it was 4-sided but from an arial photograph, we can clearly see each side is concaved in the middle, making it an 8-sided structure. Seeing that this event seemed to be reflected in the Ogdoad caused me problems for quite a while until I realized that it concerned the nature of time.

The only other members of the Pleroma Valentinus named was the last pair, Wisdom and What-has-been-willed, which as stated was the cause of the material universe, which we will address tomorrow. One point before I close to mull over, is that the fact Wisdom or Sophia was able to “turn back” indicates that freewill has always been sacrosanct.

Post April 22nd

Hi everyone, I need to apologize for the way I have been putting out a complete concept in one post. I was forgetting that although we have been exposed to the teaching for nearly three decades, many if not most of you may have never have even heard of the Gnostics, let alone their understanding of Creation. For my part, I was driven by the directive for the *Know Thyself Initiative* – to uncover and reveal the ancient *Mysteries* that explain how to transform ourselves and the world by changing the way we think. Since I know that this can heal the world and end suffering with every fiber of my being, perhaps I have been a little too eager in putting out information in days that took us nearly 30 years to amass. Anyway, as a big part of changing the way we think involves changing how we view time and our reality, as well as evolution, both physical and spiritual, we have decided to create a

general chat room to discuss this in a less overpowering way. We hope you will forgive my eagerness and join me in the chat room.

An important point we should clarify is why we were so interested in Gnosticism. It was when we learned that they predated Catholicism. Moreover, the Apostle Paul's letters were Gnostic. We will see why, as we move forward.

Post April 24th

Dear members, as promised, today we are discussing what happened in the Gnostic myth, after Sophia or Wisdom turned back in search of the First Father, always remembering that “A myth is a way to describe an absolute truth in an abstract way.” As stated, this action generated fear, grief, and confusion in Sophia, which was incompatible with the Divine realm and required a force known as the Limit to separate these “emotions” from her, placing a veil between them. Then in order to prevent it happening again, the Supreme Being produced another active/masculine, and passive/feminine pair, The Christ, and Holy Spirit to teach the members of the Pleroma about their origin.

However, there was still the issue of the expelled parts of Sophia, as because she was divine, so were the parts. This is where the reason for our existence comes in, as Christ left His partner and descended with Sophia to rescue her lost parts by creating a whole new realm the Soul Plane. Tomorrow, we will discuss how They achieved it, but for now I will be examining this “myth” from an evolutionary and even maybe scientific perspective in the Creation and Evolution chat room.

Post April 25th

Returning to the Gnostic Creation, remembering that Sophia “turned back”, her actions caused her great fear and grief or anguish. As we understand it according to Valentinus, in order to rescue the expelled parts of the last pair of emanations, after creating the Soul Plane, The Christ and Sophia transformed her Fear into Water, and her Grief/Anguish, or Despair into Air.

It was believed that Sophia experienced Ignorance which became the Element of Fire. However, as this later became associated with the active force of anger, something didn't gel with us, until we remembered that Valentinus reported Sophia's active partner was What-has-been-Willed, sometimes referred to as Self-Will. The

other problem was that Judaism only considered three Elements, viewing Earth as a condensation of the other three. Even so, we came to understand that Earth was taken to mean Sophia's confusion.

We will go more deeply into how the expelled parts became the 4 Elements in the Creation and Evolution chatroom, but for now, ponder what it means to state that all matter contains a divine spark. Tomorrow, we will lay out the plan to rescue the sparks through evolution.

At this point we should state that there were several Gnostic sects in the first few centuries of the Common Era; most were dualistic seeing the material world as evil. However, we were directed to Valentinus, a student of Theudas, who was taught by the Apostle Paul. Then we read *The Nag Hammadi Library* and other Gnostic texts, including the *Gospel of Truth*, and the *Gospel of Mary Magdalene*, and learned that the Valentinians saw the world as being Tri-partitioned, which we will get to later.

I have to admit that as until the 20th century, all information on Gnosticism came from its detractors, the heresiologists of the 2nd century, it was difficult to separate the gold from the dross as it were, but then we discovered Professor Elaine Pagels work, which showed that most of Paul's Letters could be interpreted Gnostically.

Post April 26th

Regarding the Gnostic creation, as stated, The Christ and Sophia transformed the emotions generated by separating from her active partner, and turning back, into the 4 Elements. Afterwards beneath the veil in the Soul Plane, they brought forth Archetypes to use these Elements to structure a material arena where the Divine sparks within the Elements gradually evolved through the mineral, plant, and animal kingdoms, developing consciousness. This continued for countless ages until the consciousness of Life developed reason and entered the human level. Then through continuous reincarnations of trial and error, they learned how to transmute the Elements back to Spirit. At least that was the plan. Tomorrow, we will discuss how the Gnostic structure in the Soul Plane correlates with the other world religions, especially as it brings in the Tree of Life.

One more thought concerning the Gnostic's Divine realm. Pleroma literally translates as "Fullness", which we take to mean the complete expression of the Supreme Being, or in Gnostic terminology First Father. As the 30 members were/are the manifestation of consciousness and Life, with the first eight or Ogdoad

completing an important phase, it is interesting that the last pair emanated represent the development of Wisdom and Will. I found this surprising because as a child I grew up hearing the “Will of God” used to explain every tragic event in the world, implying that everything was being driven by Divine Will. Yet, from the Gnostic perspective, the Wisdom and Will of the Supreme Being was the last aspect to appear. It becomes even more curious when we learn that the Element of Fire came from the Divine Will and was expressed as both Love and anger.

Post April 27th

Continuing with our discussion on the Gnostic perspective of Creation, we see that by transforming the expelled parts or emotions of the last pair of emanations in the Pleroma, and forming the Soul Plane, The Christ and Sophia in a way caused the existence of both Space and Time. In this way, the parts/emotions not only became the ethereal and material Universe, they also came to represent Linear time, with Water or Fear representing the future, Air or Grief/Anguish denoting the past, while both Fire and Earth represents the present.

As stated, The Christ and Sophia manifested an archetypal structure to administer every level in the Soul Plane, headed by what the Gnostics referred to as the Demiurge or *Demiurgus*. According to Wikipedia, this term originally translated to “craftsman” or “artisan” in English, but the meaning slowly changed first to “producer” and ultimately “creator.” At this time, everything is taking place in the Archetypal Plane of *Atziluth* in the Kabbalistic Tree of Life, which we believe equates to the Mayan calendar’ Tree, along with many other world religions Heaven.

Tomorrow, we will examine how according to Valentinus The Christ, Sophia, together with the Demiurge, and administrators or Archetypes set the parameters for the development of the different levels of consciousness within the Soul Plane. This of course resulted in the Evolution of Life, which requires us to bring in many different teachings.

Post April 28th

In light of my earlier post of creating a critical mass, and how considering our origins allows the Divine realm to help. Similarly, just considering that each religion or philosophy might be describing the same Force in different ways, can open the

pathways to remembrance of what we all know but have forgotten. Have a great day everyone, Love always, Suzzan

Up until now, we have been examining our origins purely from the Gnostic perspective, but once the Soul Plane was established, we entered the world of Creation. In general, as far as I know, this is where most of the world religions and philosophies start. Even though most religions name a specific creator or creators, they often describe a single force or energy where everything existing derives from, such as *Ein Soph*, *Tao*, or *Dao*, and the ineffable Source or Spirit within and surrounding everything. According to Carl Calleman, the Mayan calendar also saw something beyond existence, which he described as predating the Nine Waves. The simple fact is despite the rancor, arguments, and sadly wars, most of us know that there is something more powerful than natural selection driving our Evolution. To understand the mechanics of this we need to elicit the help of Theosophy, in the doctrine of *Rounds*, *Globes*, and *Root-Races*.

Hi everyone, it has occurred to us that some members may have wondered why we have spent so much time discussing the Valentinian perspective on the origin of consciousness and Life. We pretty much asked the same question when first led to this forgotten sect's writings. Like I said, at the time I was told to, "store the information" and think of the Supreme Being as "antimatter." Today, we understand a little better, because we now know that it's all about creating a critical mass to change our reality. A good analogy is the Matrix on steroids. By that we mean that instead of just a handful waking up from the illusion, if 777,000 people even just begin to question their purpose and role, it creates a massive shift, allowing the Divine realm to help.

Post April 29th

In welcoming everyone to this Forum for the *Know Thyself Initiative*, we feel obliged to lay out its purpose. As most members are aware, KTI was set up primarily for 777,000 individuals use in sharing their unique perspective on the Knowledge to teach others. Essentially, these loving souls are the cells of the Energetic Body of Christ, who returned in 1994, and who they connect with through their Christ-consciousness' within. Even though we use the title Christ, this "body" is open to all seekers, even those who see themselves as agnostic or even atheist, because each one was born for this very purpose. All it requires is an open mind to access a Higher Reason, which in turn unlocks the door to this Universal knowledge, and divinity's guidance.

Over almost three decades, we learned that in order to determine the ins and outs of Consciousness or Spiritual Evolution we needed to consider several sources, as they each had relevance. Initially, these sources were the Gnostics, *The Secret Doctrine*, and the Kabbalah, but when Carl introduced us to not only the Mayan calendar but also connected it to quantum physics, we could see how the ancients used multiple mediums to convey this forgotten knowledge. Realizing that this was the jig-saw puzzle I was tasked to compile, I formulated the hypothesis presented in the treatise *America's Hijacked Destiny*, and the *Know Thyself Initiative*.

Please bear with me, as I cannot explain a hypothesis covering our entire existence in a few paragraphs, and as it can help shift the way we think I need to make it as concise as possible. It starts with understanding that consciousness is not limited to what we refer to as sentient forms. We only need to remember that it wasn't until recently that plants weren't even considered sentient. With the work of the late Dr. Masaru Emoto, we know that emotions and words affect matter, so it should be a short leap to realize that all-natural matter has consciousness.

As we said, we were shown that the divine sparks within the 4 Elements became the Life-principle slowly developing consciousness through multiple rounds of Evolution. Each round, referred to as *Globe Rounds* consisted of 7 *Globes* or Earths. Nonetheless, the real breakthrough came when we understood that Life has been developing on multiple versions of Earth or *Globes*, prior to our present home, and will continue to evolve through many, many more. According to *The Secret Doctrine*, we are on the 4th Earth or *Globe* in the 4th round.

Monday, I will discuss the animal kingdom and how we have been witnessing that kingdom's evolution in leaps and bounds recently. In the meantime, KTI's Stage 2 – *Cycles of Evolution Reexamined* has a detailed explanation, not only concerning the *Globe* and *Round* cycles, but also how the Mayan Nine Waves work with this hypothesis through Carl's work, which is included in this stage.
